#ICYMI: University of Richmond News to Use

Oct. 25, 2019

The University of Richmond media and public relations team is providing @URNews2Use for your publication, website, and social media channels.

Driving Rats
We’d actually be shocked if you missed this one. More than 1,000 news outlets all over the world have covered new research out of the University of Richmond on teaching rats to drive. The results may inform future research strategies for mental health treatments. Professor of Behavioral Neuroscience Kelly Lambert led the research team. Learn more in this media release: Research Scientists at University of Richmond Teach Rats to Drive; Results May Inform Future Research Strategies for Mental Health Treatments. Contact Sunni Brown at sbrown5@richmond.edu to connect with Kelly.

Experts Guide: Halloween
October is here, and as the home of the Spiders, you know we’re excited. From spiders to zombie mania, our team has developed a list of experts who are available for all your Halloween stories over the next few days.

The Conversation
And speaking of Halloween, University of law professor Hayes Holderness authored Not all candy is candy – at least for tax purposes published in The Conversation, an independent news source for informed commentary and analysis, written by university scholars. All The Conversation articles are available to republish for free under the Creative Commons. We hope you will consider printing this article in your outlet. Each piece also has a “Republish this article” button to the right of the page for easy posting on the web.

For more UR news you can use, visit our newsroom at news.richmond.edu.

Best,
The University of Richmond Media Relations Team
